BASE

Be Ahead with Sustained Excellence

Why are IITs the Most Preferred

The exciting world of technology has always inspired the best among us. Indian Institutes of Technology, IITs in short, have become the symbolic icons of technology. It is here that the best young students of our country are groomed to become the finest in their chosen branches, in the most inspiring of academic environments. It is no secret that the whole world holds IIT graduates in great esteem. Students from these revered institutions literally walk in to world class careers of their choice. To the lakhs of aspirants every year, a seat in IIT is indeed the ultimate dream.

The Challenge of IIT Entrance: Every Question is New

The extremely stringent standards of IIT entrance examination present daunting challenges even to the best of students. It is simply because the IIT entrance exam probes into the extreme corners of conceptual understanding of core science and mathematics.

Every year is a new year. And every question is a new question. Question patterns keep changing. To take the IIT JEE head on, students need clarity of mind, mastery of subject matter and problem solving ability under pressure conditions. It is a challenge for the bravest in the land, only if they are well trained... at a place like BASE.

I can never forget my BASE experience. Frankly, those 2 years were my formative years, so far as my career is concerned. Not that I got into IIT with the branch of my choice, ... What BASE has done is to give me the confidence that I can do it - whatever!

**When the Going Gets Tough,
Our Achievers Get Going.**

Be Ahead with Sustained Excellence

IIT JEE Achiever

IIT JEE Achiever at BASE is an intensive 2-year training program for Class XI & XII students. Through its mission of enabling superior level achievement, BASE has meticulously built a comprehensive resource base that is today an engine of building cutting edge competencies in our students. That more students qualify into the IITs from BASE than from all the other competing institutions put together, highlights the advantage BASE can give for your IIT JEE preparation.

Course Components

Course Content

IIT JEE Achiever covers exhaustive content in Physics, Chemistry and Mathematics. Content addresses the journey that every student at BASE is expected to go through, viz., understanding, conceptualization and application. It covers the related topics with quality synopses and followed up with adequate worked examples and practice exercises. While the theoretical basics drive home the concepts with clarity, problems are designed to enable the students apply innovation.

BASE @ IIT JEE

2007 66
2008 62
2009 71

Classroom Sessions

Classroom sessions are interactive backed by multimedia presentations. The focus is on innovative problem solving. Students are always encouraged to explore multiple approaches to solving problems. BASE insists on regular student attendance, since each session holds a strong thread to the next and eventually to the student's performance at JEE.

Assessment

Regular tests will be conducted to prepare the students for the rigorous IIT JEE. Answers to questions in these practice tests will be discussed in the classroom. In fact, the standard of questions match those in the JEE. As a policy, we throw up a myriad surprises in these tests. Because every year is a new year and every question at JEE is new.

Additional Learning Support

Another important feature of BASE training is the learning support we provide during IIT JEE Achiever. Beyond classroom teaching, we provide a window to the following:

- Effective study techniques
- Problem solving methods
- Soft skills
- Time and stress management skills

Through its 18 years of leadership in student training, BASE has painstakingly put together best practices in learning and various tools that it passes on to its students. Especially, the planning tools are very useful.

BASE faculty provides mentoring and counselling support, to understand each student's specific academic and emotional support requirements, and work towards providing it..

Online Account

BASE believes in continuous interaction with students and their parents. All students and parents will be provided unique ID and password to access reports on attendance and performance. We believe IIT JEE Achiever is an opportunity to modify the student's learning behaviour through timely inputs and action.

Delivery

The 2-year IIT JEE Achiever Classroom Program is being offered in 2 ways:

- **Classroom Program at BASE centres.** IIT JEE Achiever is offered at all BASE centres. The schedules are convenient and the standard of teaching is consistent across all our branches.
- **Integrated Classroom Programs at select BASE partner institutions.** In this offering, students can opt for BASE IIT JEE Achiever right in their institutions. The basic objective of this program is to synchronize what is taught for Board syllabus with the inputs provided in IIT-JEE Achiever. Call us for the list of our partner institutions.

What makes BASE a better choice?

The common question among parents and students is "Why BASE?" The answer is simple. It is because every question in IIT JEE is new and BASE helps students excel through a well-planned, thoroughly researched and involved program.

What is different about BASE training? Here are a few pointers.

- **BASE Methodology:** BASE has a macro view to student training. The difference is: How to solve a problem Vs. How to solve the problem. We are focused on training our students on the process and logic of problem solving. This is the key takeaway from a BASE course. It stays for life.
- **Integrated Learning:** IIT JEE also measures students' grasp of the interrelationships among different topics and subjects. We at BASE train our students with this perspective.

- **Faculty:** Over 150 faculty members, some of them ex-IIT professors; all of them understand the tremendous responsibility of shaping the future of bright young people. The commitment and passion are unmistakable.
- **Positive Academic Environment:** Outstanding peer group, inspiring teachers and infrastructural support create a positive learning environment. "The value-based interactive environment is a most cherished experience" aver several students.

Beyond IIT-JEE

While IIT JEE Achiever helps you prepare for the tough IIT JEE, it also helps in preparation for other competitive exams like AIEEE, BITSAT, etc.

For students desirous of careers in Science & Research can aspire to join institutions like IISERs. The IISERs at Bhopal, Mohali, Pune, Kolkata and Thiruvananthapuram represent a unique initiative in India where teaching and education are totally integrated with state-of-the-art research. Admission to IISERs are based on IIT JEE scores.

How BASE training helps later

Beyond preparation for IIT-JEE, BASE training can transform the learning behaviour of students. Logical problem solving, methodical work methods and competitive outlook are traits they carry in higher learning and in their careers as well. This is the feedback we receive from several successful alumni. So, what is rewarding for us is not the immediate success of our students. It is the transformation our methodology effected in them.

Achievement @ Olympiads

IIT JEE Achiever is so well structured and comprehensive that it enables some achievers reach the national level selection training in Physics, Chemistry and Mathematics Olympiads every year. Among those who have represented India and have won medals at international Olympiads are:

Suvinay S, Gold Medalist	National Chemistry Olympiad, 2007
Amit Warriar	International Astronomy Olympiad, Ukraine, 2007
Harish R	International Physics Olympiad, Singapore, 2006
Kishore J	International Chemistry Olympiad, Singapore, 2006
Arjun R	International Physics Olympiad, Spain, 2005
Joish Rajendra Kumar	International Chemistry Olympiad, Taiwan, 2005
Ajit Kumar Nema	International Physics Olympiad, South Korea, 2004
Kiran C	International Chemistry Olympiad, Athens, 2003
Sundeep B	International Physics Olympiad, Bali, 2002
Narayan Satyan	International Physics Olympiad, Turkey, 2001
N R Prasad	International Mathematics Olympiad, South Korea, 2000
Harsha Madhyastha	International Physics Olympiad, Italy, 1999

IIT JEE Achiever also helps for competitive exams like AIEEE, BITSAT, etc.

Besides, admission to institutions like IISERs ... is based on IIT-JEE scores.

Selection Criteria

Students who have scored 80% and above or equivalent grade in Science and Mathematics SSLC (75% for Class X CBSE & ICSE) will have to appear for a written test to qualify.

For Registration and More Information

You can call us or write to us for more information. You can even interact with our student counsellors.

For registration, please contact us at the numbers mentioned or visit our website www.base-edu.in

BASE Alumni Sundeep B

He got through IIT JEE, with an All India Rank of 4, joined IIT, Chennai - Computer Science, and topped with a CGP of 9.91 on 10. Got 10 on 10 in 4 semesters - and wiped out all the previous records of B.Tech. in IIT Chennai and his score stands as the best even today. Passed out in 2006 - with the President of India Gold Medal!

BASE Alumni Shaama M S

She joined IIT Bombay - Chemical Engineering, in 2003, was awarded Young Engineers' Fellowship Programme at IISc Bangalore (2006). Awarded the Institute Gold Medal for securing the highest GPA (2007). Secured 99.95 percentile in CAT 2008. Had interview calls from IIM B, IIM L, IIM I and IIM K. Aspires to join the Indian Civil Services.
